PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1) Yes, as this is a rare case in medicine and must be presented and discussed to aid medical training and practice. 2) yes 3) No 4) No 5) Needs some changes 6)No</p> <p>The article must have the following sections: summary, introduction, methodology (presentation of the case, what was done), results, discussion and conclusion. The abstract must contain the sections of the article, avoid definitions. The results, discussion and conclusion are missing from the summary. Also include how rare this condition is (how many percent of the population is common). The keywords must be those registered in Mesh terms.</p> <p>In the Introduction, there must be definitions of terms, what the literature knows about the subject and what the objective of the study is. The article must have the following sections: summary, introduction, methodology (presentation of the case, what was done), results, discussion and conclusion. The abstract must contain the sections of the article, avoid definitions. The results, discussion and conclusion are missing from the summary. Also include how rare this condition is (how many percent of the population is common). In the Introduction, there must be definitions of terms, what the literature knows about the subject and what the objective of the study is. When presenting the case, there must be a full description of the case In the results, what was done In the discussion you should discuss with other studies in the literature.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	No. I suggest reviewing your English.	
<p>Optional/General comments</p>	The study really needs references in the introduction and discussion.
