(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1- Yes, it is some kind of important.</p> <p>2- The title is not suitable</p> <p>3- Yes, the abstract is comprehensive.</p> <p>4- Yes, the subsections are appropriate.</p> <p>6- No, all references in the manuscript are so far away from the real references. The references in the references lists are not related to the citation information. References are all mistakes.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes, it is</p>	
<p>Optional/General comments</p>	<p>- Additional comments are:</p> <p>- Writing of the scientific names of fungi is not correct, e.g. sp. Which is supposed to be spp. And not in italics.</p> <p>- There is no information about the antifungal or antimicrobial activity of selected plants in the introduction.</p> <p>- Methods: What do you mean by LRL, BCSIR in Infected sample collection?</p> <p>- The fungi were diagnosed as genus only and not at species levels.</p> <p>- There is no methods section about the antifungal test</p> <p>- Results: there are a lot of small tables. They must be collected in one table.</p> <p>- Some lines of writing are italic</p>
