

Review Form 1.7

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_113613
Title of the Manuscript:	Morbidity profile and substance use among the elderly tribal and non tribal population of the Imphal East District of Manipur
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. The article submitted for consideration actually raises pressing issues that should be addressed through both scientific research and government support. This problem, or rather its solution, contributes to the achievement of sustainable development goals, the formation of a healthy prosperous nation, which is the basis of the state.</p> <p>2. Unfortunately, the title of the article and the content are not very correlated. In the text of the article, the author does not pay attention to the concept of "PROFILE" at all. Therefore, it is recommended not to make changes to the title of the article, 3. RESULTS AND DISCUSSION to start with a description of the profile, namely, what do the authors mean by profile? What is it for? What does this give to science and practice?</p> <p>3. The abstract also recommends talking about the morbidity profile... the author, both in the abstract and in the introduction, the emphasis is on aging, but the goal clearly states that the article will talk about the morbidity profile and its assessment: "The purpose of the study was to evaluate the morbidity profile and the use of psychoactive substances..." Therefore, it is necessary to shift the emphasis. In addition, as a rule, the abstract indicates research methods, without detailing the stages, sample size, number of respondents, etc. This is shown in the MATERIAL AND METHODS part. Therefore, you should also pay attention to this.</p> <p>4. Sufficiently consistent</p> <p>5. The manuscript is scientifically correct</p> <p>6. The links are relevant and fairly new.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>1. The translation was carried out at a fairly high level.</p>	
<p>Optional/General comments</p>
