

**Editor's Comment:**

Journal Name: Asian Journal of Environment&Ecology

ManuscriptTitle:Quality of cold chainequipment, a guarantee of carbonfootprintreductionfromfoodwaste to a sustainableenvironment.

Following the constructive and positives remarks of the reviewers summarized below and given the various corrections made by the author, as a result I am in favor of the publication of this article in the Journal «Asian Journal of Environment & Ecology».

Note: the article would have much more impact if it had added the notion of «overshoot day» (The metric Ecological Footprint).
