

Editor's Comment:

I reviewed the original paper. I looked at the opinions of the referees. I checked the author's corrections. I have reviewed the referees' final decision. I reviewed the revised paper. Unfortunately, the corrections have not been fully made. researchers should reconsider carefully. I'll check again after it's fixed.

Not Accepted

The recommendations of reviewer 1 and reviewer 2 were examined. It seems that some

Recommendations were not implemented. The recommendations need to be carefully

reconsidered. Reviewers have made very valuable and relevant suggestions. It is strongly required

to be organized according to these recommendations. It can be reviewed again after adjustments.
