

Review Form 1.7

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_112018
Title of the Manuscript:	Influence of Naphthalene Acetic Acid, Gibberellic acid and Calcium chloride on Quality Parameters of Kagzi lime (Citrus aurantifolia Swingle)
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>		
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>I thank the Editor and authors for the opportunity to read this research. The study is longitudinal and covers the last three years, carried out during two cropping seasons. The research is interesting. I make the following comments.</p> <ol style="list-style-type: none"> In the Introduction section, in the following sentence authors could eliminate "etc" and make the sentence as: "Plant growth regulators (PGRs) are biosynthesized naturally by plants that modify growth enhancement in the branching and rebranching of shoot and root growth, alter or trigger inter alia fruit maturation, reproduction, of cultivated plants and play a role significant in mitigating abiotic stresses." All tables 1, 2 and 3 must be included in the text. The question I ask to improve the quality of the fruits cannot be replaced by something equivalent that does not contain sprays? What is the effect of these sprays on the planet's sustainability? 	
<p>Optional/General comments</p>
