

Review Form 1.7

Journal Name:	Asian Journal of Biotechnology and Bioresource Technology
Manuscript Number:	Ms_AJB2T_112850
Title of the Manuscript:	A review on various bio-resources as a tool to reduce water pollution via eco-friendly adsorption technology
Type of the Article	Review Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes 2. Yes 3. Yes 4. Yes 5. No (see comments below) 6. Yes</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>English is adequate for scholarly communications.</p>	
<p>Optional/General comments</p>	<p>I suggest including tables in which a comparison of the efficiency of the different technologies is done as well as the efficiency values comparing different works of the same technology applied for different contaminants (using the same indicators of cost, practicality, efficiency, practicability, reliability, environmental impact, creation of sludge, operational difficulty, and the potential formation of harmful byproducts).</p> <p>"highlighted the importance of bio-resources in adsorption technology, its mechanism and its significance in wastewater treatment process": I think that a comparative study of the different wastewater treatment methods should be done in order to support this conclusion.</p> <p>Although the scientific interest of the subject is high, I think that this ms is a very superficial analysis based, mainly, in specific examples and case studies.</p>
