	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>This is important manuscript and has great public health importance specially when a large number of people all over the world are being vaccinated against Covid-19 by a variety of vaccines manufactured by different companies and research organizations. Covid-19 is a re-emerging infection in many countries, and a large number of people are likely to be vaccinated in future. So it is important to know both short-term effects and long-term effects particularly on renal and hepatic functions on the vaccinated subjects</p> <p>The abstract is well written, and the main article is well written in proper sections and sub sections Yes</p> <p>Number of references are adequate and contains many recently published articles</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	Yes	
<p>Optional/General comments</p>	Analytical methods used for assessing renal and hepatic functions has been described in the main body of the article, which is not right, will not be of much interest for the average reader. They can be included in appendages at the end of article for interested readers.
