	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Intravitreal injections are one of the most common OT procedures now-a-days. So, this is a relevant case report.</p> <p>Yes</p> <p>Can be better articulated</p> <p>Yes</p> <p>Yes</p> <p>References 1 and 5 are basically for the same statement. Can look at this article also Kon Graversen VA, Meredith T, Landers MB 3rd, Garg S. Immediate hyphema after intravitreal injections of ranibizumab. Retin Cases Brief Rep. 2013 Summer;7(3):242-4. doi: 10.1097/ICB.0b013e31828eeef8. PMID: 25391114.</p> <p>This is not the second case report of hyphema post intravitreal injection. To quote the above study "To the best of our knowledge, this is the third report of the development of hyphema associated with intravitreal injections."</p> <p>Can add rationale for treatment given in discussion section.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Needs a lot of improvement. Punctuations, incomplete statements	
<p>Optional/General comments</p>	Age not mentioned as 'years'. Which test was used for visual acuity? Can mention about taking anti-coagulants. Rubeosis iridis.	

PART 2:
