

Review Form 1.7

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_110777
Title of the Manuscript:	Vertical Farming: The future of controlled-environment agriculture and food-production system
Type of the Article	Review Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>While the review article carries significant importance within the scientific community, I do have the following comments for the author. The title of the article is good. I have listed my comments for the author as follows;</p> <ol style="list-style-type: none"> 1) The abstract needs modification. I suggest the author indicate the objective of the article, methods used, major findings, and suggestions for policymakers. 2) The author did not use any numbers to indicate sections and subsections of the paper. I suggest that the author include numbers to indicate the sections and subsections of the review article. 3) Being a review article, the review article has only one table and no figures or graphs at all. I suggest that the author add more relevant tables and figures to the manuscript. 4) I also suggest that the author present the ideas listed under 'Fertigation in Vertical Farming & Plant-Growing Media in a Vertical Farm' using a figure or table. 5) Why the manuscript is done? I recommend that the author provide a more detailed explanation of the contribution made by the review article. 6) The overall structure of the review article is not clear, resulting in a lack of a smooth flow of ideas. Therefore, I suggest that the authors indicate the structure of the manuscript and use appropriate conjunction words to enhance the readability of the review article. 7) I also suggest the author revise the conclusion section. It is not clear whether it is solely a conclusion or if it incorporates recommendations/suggestions for policymakers. 8) Proofreading is required 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>I suggest that the author revise the conclusion section. It is not clear whether it is solely a conclusion or if it incorporates recommendations/suggestions for policymakers.</p>	
<p>Optional/General comments</p>	<p>In addition to my comments, I strongly suggest the author improve the overall structure of the review article.</p>
