

Editor's Comment:

In studying the manuscript, I found it, a short, original research article.

1. The title is relevant.
2. Abstract is appropriate.
3. Keywords are enough.
4. The introduction is explanatory.
5. Methodology is discussed.
6. Analysis is significant.
7. Conclusion and recommendations are well mentioned.
8. References are enough.

I recommend the manuscript entitled "The Relationship between Service Economy and Carbon Emissions in Jiangsu Province China and the Influencing Factors" for publication.
