Title are good and have illustrated the manuscript purposes in the most simple way. From my perspective the abstract has explain the most important part of the manuscript, but not so much on the methods, which may confuse some people who aren't familiar with this methods (CS-ARDL). the subsections look accurate and seems to be all in the right places, this goes the same for the structure The manuscript are very scientific especially with the economic models and theory, which are connecting the principle of islam and the main factor involve in economic growth. Reference seems good, no additional recommendation from me 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>Yes, the language used in this manuscript is good, easy to understand, but on the economic model subsection, it may be a little bit hard to understand especially for reader that aren't majored in economy and social sciences.</p>
