PART1:ReviewComments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write a few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes</p> <p>Yes</p> <p>No.</p> <p>A conclusion must be added. Yes</p> <p>No, the references are very old. Add recent citations and add more</p> <p>In this manuscript, the authors report on the "Effects of different organic nutrient sources on soil properties and yield of organic rice (<i>Oryza sativa</i> L.). Overall, the manuscript appears descriptive.</p> <ol style="list-style-type: none"> References need to be added to the paragraph: "Rice (<i>Oryza sativa</i> L.) is the prime source of food for nearly half of the World's population and it is one of the most important food crops in Asia. More than 50 per cent of the global population consume rice particularly. It plays a major role in diet, economy, employment, culture and history. Rice is the staple food for nearly 65 per cent of the population in India". It is necessary to write completely so that the reader can understand the first impression before writing: ASPEE; RDN; NADEP, PSB, ... Biological parameters of the soil: the chemicals and methods used should be clearly stated. Relationship between growth and yield parameters, yield, fertilizers. In the graphs shown, the experiment has been repeated? Please add Values are means \pmSE if applicable. Are the values of the biological soil parameters guaranteed to be correct? Is $\times 10^{-n}$ cfu/g or $\times 10^n$ cfu/g. For example: foliar application numerically higher fungal population (12.3×10^{-3} cfu/g) or (12.3×10^3 cfu/g). 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications?
