

Review Form 1.7

Journal Name:	Asian Journal of Medical Principles and Clinical Practice
Manuscript Number:	Ms_AJMPCP_111092
Title of the Manuscript:	A reflection on the incidence and frequency of different injury patterns of some of the most prevalent orthopedic sports injuries in players
Type of the Article	review

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes, it does describe the injuries pattern among athletes involve in sports. The author did mention several sports such as football players, equestrian, ice hockey, rugby. The pattern is different depends on each sport (what is the reason to choose these sports?)</p> <p>2. YES, but can add also ...in different sports/combat sports/racquet sports (to name a few). Focus on which sport that are popular/Olympic sports.</p> <p>3. Background was ok, but need to add some problem regarding injuries. Main review, should add also some percentage on injuries, which part of the body occur most common injuries. It would be meaningful if you can add also top 10 sports that occur injuries and also most common body part that involve injuries. Do overall sports would be okay</p> <p>4. Yes, but can improvise, such as add table to show listed version. Better understanding to the readers. Most probably top 10 sports that occur most injuries (table), and also which part of the body that occur most injuries (example ligament/head/upper limb/lower limb/back/hamstring etc). put the information as table would be meaningful, I guess.</p> <p>5. Yes, appropriate.</p> <p>6. Need to add most recent references (2023?)</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	YES, appropriate	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
