

Editor's Comment:

The final decision for manuscript number 2023 JEA111138 entitled "Mitigation of arsenic contamination through biotechnological approaches in rice"

Following the evaluation of all documents related to the manuscript, I agree with the Reviewers that the manuscript is acceptable for publishing in the Journal of Experimental Agriculture International. Although the manuscript was corrected following the requirements and suggestions of the reviewers, additional correction is still needed.

- The name/s of author/s must be added.
- Keywords should be changed because keywords should not be the same as words already used in a title.
- According to the Publisher requirements, references must be numbered as [1], [2-4], etc, and listed in the REFERENCES section in order of appearing in the text, not alphabetically.

My decision is: Accept after minor revision.
