

Review Form 1.7

Journal Name:	Asian Journal of Research and Reports in Ophthalmology
Manuscript Number:	Ms_AJRROP_111464
Title of the Manuscript:	Foveal atrophy as a sequelae to traumatic central serous chorioretinopathy
Type of the Article	Case study

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><u>Compulsory</u> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes</p> <p>Suggested title- Foveal atrophy following traumatic central serous chorioretinopathy- a rare case report</p> <p>Please provide a structured abstract as per journal guidelines</p> <p>The case report can be divided into subsections such as history, examination, investigation, diagnosis and management, follow up.</p> <p>Yes</p> <p>15 references should be ideal, with majority from the last 15 years</p>	
<p><u>Minor</u> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>It is suggested to write the manuscript in completely formed sentences. For example, Intraocular pressures were OD 16 mmHg OS 19 mmHg would be better written as "Intraocular pressure was 16 mmHg in the right eye and 19 mmHg in the left eye by non contact tonometer" (or the method used in this case). The same should be applied to the entire manuscript. Also, please maintain same tense form throughout the manuscript. The current manuscript is in past tense at some places in present in others, which is grammatically incorrect.</p>	
<p><u>Optional/General</u> comments</p>	<p>1. Please provide a photo of FFA, if available.</p> <p>2. A more detailed introduction is suggested, beginning with a definition and pathophysiology of CSR, then introducing the topic at hand.</p> <p>3. Case report should be sequential from history, examination, investigation, diagnosis and treatment, follow up.</p> <p>4. Please write the manuscript in complete paragraphs instead of once sentence in one paragraph.</p> <p>5. Briefly discuss CSR in one paragraph including etiopathogenesis and treatment and prognosis in uncomplicated cases. A description of all factors will make the manuscript more holistic.</p> <p>6. Discuss potential long term complications in this case. Discuss foveal atrophy following CSR in more detail.</p> <p>7. Please include more and recent references. References should be mentioned in uniform Vancouver style.</p> <p>8. Please write a little longer conclusion.</p>
