

## Review Form 1.7

Journal Name:	South Asian Journal of Research in Microbiology
Manuscript Number:	Ms_SAJRM_111083
Title of the Manuscript:	Isolation, Identification and Antibigram of Bacteria isolated from Raw Cow Milk in Dutsin-Ma, Katsina State
Type of the Article	An observational study

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes this manuscript is important for scientific community as everyone consume milk and milk products daily by almost all human beings. Maintaining proper protocol of processing, hygiene etc helps in prevention of complications or death of human beings.</p> <p>2. Isolation, Identification and Antibigram of Bacteria isolated from uncooked Cow Milk in different location of Dutsin-Ma, Katsina State- An Observational study.</p> <p>3. Abstract need to structured proper like Background Aims and Objective, Materials and methods, Results and conclusion.</p> <p>4. Not appropriate need to do some changes as mentioned. Not mentioned reference numbers in the manuscript. Not mentioned full form of CDC, CLSI. Not mentioned specific type randomization technique. Table 6: Demonstrated the microscopic and biochemical characteristics of five bacterial species associated with the raw cow milk- NOT MADE. Not mentioned Figure / Graph number in the manuscript but Graph is prepared and displayed. Not mentioned about statistical analysis, test and P value etc</p> <p>5. Manuscript is scientifically correct but need to do some changes. As mentioned above</p> <p>6. Not written in Vancouver style References. Latest reference need to be added.</p> <p>Additional suggestion : write in proper format with uniform front size , type and spacing</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes, but some sentence and grammatical correction need to improve	
<p><b>Optional/General</b> comments</p>	Correction done in the manuscript as there was grammatical mistakes.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
