Majority of the data mentioned in this manuscript are already known to the scientific community, and there is nothing new mentioned in this study.</p> <p>Title is suitable as the manuscript deals with multi-aspects analysis.</p> <p>Yes the abstract contains most of the informations mentioned in the study.</p> <p>Yes all the subsections and structure of the manuscript are appropriate.</p> <p>Yes.</p> <p>Yes all the references mentioned are appropriate and sufficient.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>No, language should be improved.</p> <p>Eg. 3rd para 1st line, can be reframed as - Turmeric, both black and yellow varieties, is a rizome belonging to the Zingiberaceae family, cultivated organically in the hilly terrains of India.</p>	
<p>Optional/General comments</p>	<p>There seems to be a lot of mistakes in sentence framing. Most of the sentences are incomplete or lacks meaning. Also there are many short sentences which can be clubed together to form a proper sentence with better understanding. Also the word 'the' is used unnecessarily at many places, which makes the whole sentence grammatically incorrect.</p>
