(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>It's a very important and useful case report. A reasonable approach to the acute management of simultaneous CCI is a combined treatment of both vascular territories, but it may lead to complications and so the treatment should be individualised in accordance with the situation and priority.</p> <p>..</p> <p>Title of the article should be more precise, to the point, and clear to the readers. I think, "should management of CCI type 1 with PTCA be preferable to thrombolytic administration" would be more appropriate title.</p> <p>Abstract is comprehensive.</p> <p>Structure of manuscript is appropriate.</p> <p>I think it's scientifically correct and acceptable.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Spelling /typing error like infraction (infarction), AIM (AMI) have been corrected. Otherwise okay.</p>	
<p>Optional/General comments</p>
