<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Exchange rate, inflation, and other macroeconomic variables in the study are of great importance to economic forecasting and development, particularly for developing countries such as Nigeria, whom suffers from economic instability and there is a need for those variables to be studied in order to control its direction for the benefits of the economy. The title of the article is appropriate to the economic model of the study.</p> <p>The abstract of the article is relatively acceptable and comprehensive.</p> <p>Yes, the structure of the manuscript is appropriate, and the subsections forms the article toward the objectives of the article. The economic value of the article is important to scholars and my comments should enhance the scientific quality of the article. As per my comments in the manuscript, the author needs to re-run the regression conducted in subsection 3.2 with alternative econometric technique to get reliable results and provide proper recommendations to Nigeria ...</p> <p>Most of the references are recent, and I believe there is a capacity for the author to enrich the study with further references.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The language used by the author is simple, the flow of sentences and paragraphs makes the article easy to read and understand. But I always advise authors to ask for external audit on the language of the article.</p>	
<p>Optional/General comments</p>	<p>I have raised my comments for sections 1.0 to 3.1. However, for sections 3.2 to 4.1 (i.e. results, analysis, conclusion, and recommendations), I will be able to provide my inputs economically and scientifically, after the author runs the regression with the econometric model(s) advised in the attached manuscript.</p>
