<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>The &lt;English quality is suitable</p>	
<p><b>Optional/General</b> comments</p>	<p>The author must be congratulated for bringing to light this problem in developing countries, with economic problems and problems of organization and treatment of public health to influence government support policies and international aid, focusing attention on specific needs such as this topic. The methodology used is very correct and the information provided is very well synthesized, offering data of undoubted usefulness.</p> <p>Globally, between 250,000 and 500,000 people suffer a spinal cord injury (SCI) each year. In any country with high development, these types of diseases pose a problem in treatment due to lack of institutional, economic support and family overload, in countries like Ghana and similar the situation despite the family support and customs of solidarity that positively exist in these cultures, support mechanisms and aid must be increased</p> <p>This information is essential at the government level to optimize the. support aid from international organizations</p>
