

Review Form 1.7

Journal Name:	Cardiology and Angiology: An International Journal
Manuscript Number:	Ms_CA_111151
Title of the Manuscript:	Streptococcus Gordonnii: a rare cause of infective endocarditis with high embolic potential revealed by febrile ischemic stroke.
Type of the Article	Case study

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The current research is very valuable in order to identify rare cause of infective endocarditis</p> <p>Yes, title of the article is suitable but please revise the title. The name of bacterial genus and species should be italicized including Streptococcus Gordonnii "<i>S. gordonnii</i>"</p> <p>The abstract of the article is much summarized, Please improve the abstract</p> <p>YES</p> <p>YES</p> <p>YES</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>The paper should be revised for addressing the grammatical errors.</p>	
<p>Optional/General comments</p>	<ol style="list-style-type: none"> Please provide suitable keywords from MESH? (http://www.nlm.nih.gov/mesh/MBrowser.html). Please revise the title. The name of bacterial genus and species should be italicized in all parts of the manuscripts including Streptococcus Gordonnii. "<i>S. gordonnii</i>", <i>S. mitis</i>, <i>S. anginosus</i>, <i>S. salivarius</i>. Please correct these. Please improve the abstract, it's much summarized. What's meaning of "AE" in the abstract? How <i>S. gordonnii</i> were detected in your study. what's is the main bacteriological test for detection of this bacteria? How blood culture was done? Manually or instrument. The chronology of the detection is unclear. The patient had endocarditis, <i>S. gordonnii</i> was isolated from the blood culture. How you prove that this bacterium is definitely the cause of endocarditis? Have specialized tests or pathology been done? This claim not correct. It can be said that blood infection is probably associated with bacterial infection. After identifying this factor, what were the most important treatment measures for both endocarditis and blood infection? Was the antibiogram done in the laboratory? Please mention the possible pathogenicity of this bacterium in infective endocarditis.
