

Review Form 1.7

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_111106
Title of the Manuscript:	On u-d Quark Coulomb Origin of Nuclear Force
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. The manuscript seems to be a review work on the above topic. If am not mistaken, then more literature should be reviewed. Then it will be useful for scientific community.</p> <p>2. The topic as well should be changed to "a review work On u-d Quark Coulomb Origin of Nuclear Force".</p> <p>3. The subsections should deal extensively on the authors' present work rather than report from other works.</p> <p>4. The abstract should details step by step processes or what the authors have done in the present work.</p> <p>5. The authors should make the work self explanatory and highly comprehensible.</p> <p>6. The references are recent, however, more should be added.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>	<p>The authors should organize the work in such a way that demarcate literature review and the authors present work. I will recommend the authors to use this article as a guiding article. Mass spectrum of heavy quarkonium for screened Kratzer potential Eur. Phys. J. Plus (2021) 136:87 https://doi.org/10.1140/epjp/s13360-021-01090-y</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
