

Review Form 1.7

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_111842
Title of the Manuscript:	Influence of Plant Growth Regulators on Rooting of Various Stem Cuttings from Guava cv. Arka Kiran
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes. It is vital to assess the possibility/ effectiveness of utilizing different plant growth regulators on economically important crops when asexual plant propagation techniques are practicing to discover the optimum concentration for sustainability.</p> <p>It is suggested to modify as "Impact of selected plant growth regulators on rooting response of stem cuttings of <i>Psidium guajava</i> L."</p> <p>It is suggested to add a sentence on the background of the study at the beginning. Moreover, it is much more worthy if it is possible to mention the optimum IBA concentration which farmer need to utilize for farming. Research findings are vital to transmitted to the bottom level to contribute towards economic development.</p> <p>Background of the study need to highlight. Methodology is needed to be more precise with the selected plant variety with scientific name. it is advisable to mention the study time duration. Research findings (eg: number of leaves) needed to present with standard deviation. Suggest to include the optimum IBA concentration which a farmer need to use.</p> <p>Need modifications</p> <p>Recommended to refer more.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>Mistakes are there WHICH ARE NEEDED TO BE CORRECTED</p> <p>Eg: Punctuation errors hese regulators were applied to single-node cuttings with one leaf, double node cuttings with two leaves, and herbaceous cuttings. Hyphen missing</p> <p>spelling mistakes Due to its nutritious content, delightful taste, appealing flavour, and year-round a.... flavor</p> <p>other grammer errors The experient was carried out at Department of Fruit Science,... the Department The cuttings taken from one..... cuttings were taken</p> <p>Likewise other mistakes are needed to be corrected</p>	
<p>Optional/General comments</p>
