

Review Form 1.7

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_111721
Title of the Manuscript:	The Effectiveness of Modified Pilates Program with and without Kinesiotaping on Postnatal Urinary Stress Incontinence- A Randomized Clinical trial
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. ? Is the abstract of the article comprehensive</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Yes, given the expansion of the use of KT in other areas of health, this article is a valuable contribution for professionals who work with this resource, bringing light and perspective as well as encouraging further research.</p> <p>2. Yes, the title of the article is consistent with the study proposal</p> <p>3. The summary could be included in the general objective of the study</p> <p>4. Yes, the structural form of the article is adequate</p> <p>5. The structure is adequate, however I miss photos of the placements despite the description being well done</p> <p>6. From my point of view, since kt was used, there should be more articles about the material and where the voltage and application values came from.</p> <p>in the introduction you should discover what kt is, what its physiological and mechanical mechanisms are, the origin of the idea of using KT and why it was chosen, I consider it important to reproduce this study that the cotton and elastane composition of the bandage was discriminated, given the variety of existing compositions.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes, the language is well suited for the academic who decides to read a scientific article.</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
