

Review Form 1.7

Journal Name:	Asian Journal of Research and Reports in Hepatology
Manuscript Number:	Ms_AJRRHE_109774
Title of the Manuscript:	Evaluation of chronic toxicological effects of 2, 2-dichlorovinyl dimethyl phosphate (Sniper) in the vitreous humor liver function parameters of New Zealand white rabbits
Type of the Article	original research article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. The manuscript shows a informative,s scientific data collected but some major corrections need to be addressed before it can be published.</p> <p>2. Title is suitable for this article</p> <p>3. Included comprehensively</p> <p>4. Yes, appropriate</p> <p>5. Need to discuss data with more scientific evidence and "need for the study"</p> <p>6. Discussion section needs improvement. Discuss all the study parameters in comparison to previous study reports and cite more recent references to support your study findings. - All references must match journal specifications. - Conclude the outcome of your result using appropriate sentence in the abstract part</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>1. Suitable english used in this article</p>	
<p>Optional/General comments</p>	<p>1. In the introduction 4th paragraph can rewrite "mice that were orally ingested" instead of 'treated'.</p> <p>2. Need to discuss with more comparisons with previous study has done already</p> <p>3. Author need to address the following comments - Why heart is preserved instead of liver - Is there any toxicological changes, other than liver - What has normal parameters has taken during study period (weight, pupil size, convulsions/behavioral changes/ food intake/ wellness parameters) if any - Is this methodology new / modified with previous / any reference - How do you conclude the rabbit has got sufficient toxicity to draw the results - What is a,b significant indicates in results section - Conclusion section must be clear and concise, Revise - Please write objective of your study (no where it is mentioned).</p>
