

**Editor's Comment:**

After having scrutinized the peer review documents for the manuscript titled "Pixel-based trends mappings in the Guinea Region of West Africa: Integrating Remote Sensing Data and MODFLOW Modeling for Sustainable Resource Management and Monitoring", I saw that the manuscript has been reviewed by two different reviewers. All the reviewers have accepted the paper with high scores. The authors made appropriate changes to their manuscript in accordance with the reviewers' comments. Therefore, the manuscript can be accepted for publication in the Journal of Geography, Environment and Earth Science International.
