

Editor's Comment:

I have read the text of the manuscript, the reviewers' reports, and a revised version of the text of the manuscript.

I consider the topic of the manuscript relevant. The research results have scientific and applied value.

At the same time, I had some comments about the text of the manuscript, namely:

1. Authors must check the text of the manuscript for compliance with all requirements for registration. In particular, this concerns the numbering of subdivisions.
2. It is necessary to determine the type of this paper. Perhaps it should be classified under Commentaries / Opinion Articles. I leave this matter to the discretion of the editors.
3. It is also possible not to use the abbreviations (EV) and (EVs), if everywhere the phrases "electric vehicle" and "electric vehicles" are used without abbreviations.

Thus, I believe that after taking into account the listed remarks, the document on the topic "Powering Ahead: Current Landscape of Electric Vehicles (EV) in India" can be published in the International Journal of Environment and Climate Change.
