Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<ol style="list-style-type: none"> 1. Must italicize or underline the scientific name. 2. In haste, there are some type errors and spelling errors to be corrected and rectify. 3. It will be more informative if introduction contains more of literature background and in-text citations to support problem statements of the paper. 4. In material and methods section; it will be more appropriate if we can write formula; Burton (1951)'s formula, Warner (1952) and Allard (1960) employed for the analysis besides the author citation. 5. In result section, it will be more scientific if values reported contains "Unit" and in case of the current manuscript (%) for the values. 6. Table citations is required to supplement your result section. 7. In haste, one reference was missed out for Nicholas et al., 2020.....in the reference list. In overall the manuscript is very relevant, understandable and informative for the scientific community. Hoping for the best and best wishes. 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 		
<p>Optional/General comments</p>
