If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The manuscript described the simulation of vibrating screen for sand sorting. The authors simulated the sorting machine with 3 simulations about frequencies, amplitudes and angles, then suggestions were given. However. The simulations were simple and optimal parameters were not shown.</p> <p>Each simulation, the authors did not give values of other parameters when the main parameter was changed.</p> <p>The abstract was still mistakes, for example: Inclination Angle.</p> <p>Simulation Values in the manuscript should be experimented</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications?
