

**Editor's Comment:**

Semi-final editorial decision: Minor Revision

Comment 1: The boundaries of the design of experiments must be limited.

Comment 2: The Significance and Goals should be provided in apposite places of the paper.

Comment 3: The Abstract should be strengthened.

Comment 4: Add the following references:

2018. Syrian Case Study: Behçet's Disease clinical symptomatologies, ocular manifestations, and treatment. *Chronicles of Pharmaceutical Science* 2(2), 502–509.

2018. Halothane anesthesia – fact or fallacy? *International Journal of Drug Safety and Discovery* 2(1), 010.

2018. Beyond pain, fear, withdrawal-findings, and problems involving change - treatment and application for a chronic addiction on alcohol do not end. *Drug Designing & Intellectual Properties International Journal* 2(1), 1–9.

2019. Keeping track of adverse drug reactions in remote areas of the world is essential for the improvement of the quality of life at a global scale. *Advances in Pharmacoepidemiology& Drug Safety* 7(3), e144.

Comment 5: The Conclusion section must be enforced.
