**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <ol style="list-style-type: none"> <li>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</li> <li>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</li> <li>3. <b>Is the abstract of the article comprehensive?</b></li> <li>4. <b>Are subsections and structure of the manuscript appropriate?</b></li> <li>5. <b>Do you think the manuscript is scientifically correct?</b></li> <li>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></li> </ol> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>		
<p><b>Minor</b> REVISION comments</p> <ol style="list-style-type: none"> <li>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></li> </ol>		
<p><b>Optional/General</b> comments</p>	<p>Authors have tried to evaluate the effects of the herbal supplements amla (<i>Emblica officinalis</i>) and giloy (<i>Tinospora cordifolia</i>) on the liver function parameters of Magra lambs living in western Rajasthan's arid zone by performing liver function tests. Though the data is promising, the following issues need to be addressed</p> <ol style="list-style-type: none"> <li>1) Please properly define the extensive system, intensive and semi-intensive system in detail for better understanding.</li> <li>2) Application part of the study is lacking in the manuscript.</li> <li>3) The motivation to undertake this study should be put in the introduction section (to show that the studies are not only done to disprove the previous reports)</li> <li>4) It should be properly addressed what will be the final benefit of this supplementation apart from the tolerance of toxicity as mentioned in conclusion</li> <li>5) Do they tried using any lamb with diseased conditions and got the better parameter upon supplementation of the Amla and Giloy?</li> </ol> <p>Did they tried the maximum dose of the formulations to check the upper tolerance level? If yes, results needed to be highlighted in the text.</p>
