

Editor's Comment:

After having scrutinized the peer review documents for the manuscript titled "Optimizing Geotechnical Parameters For Sustainable Road Embankments In Flood Disaster-Prone Areas Of Bangladesh", I saw that the manuscript has been reviewed by two different reviewers. All the reviewers have accepted the paper with high scores. The authors made appropriate changes to their manuscript in accordance with the reviewers' comments. Therefore, the manuscript can be accepted for publication in the Journal of Geography, Environment and Earth Science International.
