

Editor's Comment:

Regarding the paper about the fish industry:

Chapter 2: a survey and a quantitative data analysis, isn't it?

Chapter 3 is exactly the Study Case, NOT Results.

In Conclusions, of course, some lines of the Results of fishery activities.

However, the References must be written in the alphabetical order of the author's name and, immediately after the year of publishing: first reference Ariyani FDP (what the year?), next AulawiH..(2023) ---until West Java... (2019) and Yolanda MTRN.. (2019)

With restructuring of the paper and highlighting the good results in the Conclusions part, ok for publishing.
