The investigate focused on how the COVID-19 affected the production of the flowers, to determine the effects of Health Protocols on the Performance of Floriculture and to find out the policies and programs they implemented to cope up with COVID19 pandemic. The paper says that 220 flower farms in Kenya with Karen Roses had been targeted to study population. The methods in this paper include objectives, first to determine the effect of COVID-19 on the production of flowers, second to determine how the health protocols affected the performance of floriculture sector and third to find out if the measures that they implemented helped them cope up with COVID-19 pandemic. The finding in the manuscript is focusing on the single dataset on Karen Rose sales from 2016-2021 from 220 flower farms in Kenya. It can be elevated to multiple database on different cut flowers from multiple farms. The dataset is small and it can be escalated. Journal Name: Asian Journal of Advanced Research and Reports</p>
