PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>MY SUGGESTIONS BEFORE PUBLICATION:</p> <p>1) IN ABSTRACT SAMPLE</p> <p>I suggest to write -----</p> <p>The study's target population includes young people who are between the ages of 15 and 29. There were roughly 270 responders in the sample, with 55.7 percent men and 46.3 percent women.</p> <p>2) INTRODUCTION I HAVE CORRECTED in the following lines:</p> <p>Even in modern times, Gandhi's adage "If the Indian village is developed, the nation is developed" holds. In the rural areas of India, which is an agrarian nation, more than 70% of the population lives. Most of the rural population depends on agriculture and related industries for their living. Any society must have the capacity for its members to contribute to social change, economic expansion, and process advancement. Consequently, institutions, entrepreneurship, and skill development are needed for a country to advance towards development in order to start and complete the process of change & adjust to the shifting sociocultural structures and patterns of livelihood (Singh, 2016)</p> <p>3) THEORETICAL BACKDROPS I suggest to write the following lines as corrected by me:</p> <p>The present study considers the livelihood issues of the tribal people of Odisha in general and the rural tribal youth of Keonjhar District in particular. The tribal youths face a lot of challenges in their engagement and employment, as they face a lot of difficulties to adjust them in the urban areas as well as outside their domicile. Hence, the study aims at how their existing skills are to be developed as well as new skill training is to be provided so that without disturbing their lifestyle, Culture, habits, and place of living, they can earn their livelihood in a sustainable manner so that they can lead a decent life.</p> <p>4) Profiles of rural tribal Odisha In Profile correction may be made as below:</p> <p>In Odisha, the population comprises about 40% of people between the ages of 15 and 29. They can become change agents by learning a range of career-relevant abilities that will allow them to make a difference in their own lives as well as the lives of others.</p> <p>5) Skill Training Institutes correction may be made as below:</p> <p>In the rural district of Keonjhar, one barrier to getting skill training is the lack of professional training institutions. Due to the dearth of institutions providing vocational training in rural areas, many tribal young people are searching for lucrative jobs in other states.</p> <p>The respondents were given the question, "Absence of skill training institutions causes unemployment among the rural youth," in order to validate the aforementioned statement.</p> <p>6) In Skill Development Programmes for rural youth corrections may be made as below:</p> <p>A flagship programme for providing skill training to youngsters, the recently approved</p>	

Review Form 1.7

	<p>Pradhan Mantri Kaushal Vikas Yojana (PMKVY) focuses on better curricula, better pedagogy, and skilled teachers. The instruction covers soft skills, personal hygiene, and any necessary behavioural changes. He stated during the Mission's debut that it aims to give youngsters nationwide access to vocational training. By 2022, the government hopes to have trained 40.02 crore individuals in vocational skills nationwide through the skill India Mission.</p> <p>7) RESULTS AND DISCUSSION</p> <p>Demographic Profiles</p> <p>There were roughly 270 respondents in the sample</p> <p>WHY ROUGHLY has been USED. IN RESEARCH EXACT NUMBER IS REQUIRED</p> <p>8) IN CONCLUSION: MY CORRECTION;</p> <p>Fourthly, the Government would care for the market while local young entrepreneurs and skill trainers strive to produce the most products possible.</p> <p>9) I SUGGEST USING SOME STANDARD WORDS; FOR EXAMPLE, THE AUTHOR HAS USED</p> <p>RURAL KIDS But working place it should be Rural Children</p> <p>10) TENSE should also be corrected, e.g.</p> <p>Of the youth, 32.2% are/WERE male and 30.7% are/WERE female. 24.1% of adolescents strongly agree, according to 15.6% of young men and 8.5% of young women.</p> <p>11) The study's geographical focus is on Odisha's rural district, Keonjhar. The study's (STUDY's not required) target population includes young people instead use YOUTH residing in Keonjhar district who are /WERE between the ages of 15 to (To not Correct BETWEEN) 29.</p> <p>There were roughly (ROUGHLY SHOULD NOT BE USED EXACT FIGURE IS IMPORTANT) 270 responders in the sample, with 55.7 percent men and 46.3 percent women.</p>	
<p><u>Minor</u> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>		
<p><u>Optional/General</u> comments</p>
