

Editor's Comment:

"On the Confidence Intervals in Bioequivalence Studies" now renowned "Choosing Confidence Intervals in Bioequivalence Studies: $100(1 - 2\alpha)\%$ and $100(1 - \alpha)\%$ Approaches" is a very interesting and important article on its topic, in which the authors knew how to take advantage of the good work of the reviewers to improve it even further. Rigorous, well written , and very informative, deserves to be published in AJPAS in its present form.
