

**Editor's Comment:**

Despite three positive reviews, I believe that the manuscript submitted for evaluation requires full corrections and additions:

- Figure 1 - quality needs to be improved,
- Figure 3 - it is not a drawing or chart, but a table, so it should be presented as a table,
- Figure 10 - no one knows what it represents,
- Figure 13 - it should be presented as a table,
- many graphics/drawings contained in this work are taken from other sources - doesn't publishing them in this way require the consent of the authors/publishers?
