

Review Form 1.7

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_118765
Title of the Manuscript:	The Application of Immersive Virtual Reality in Occupational Therapy-based Pulmonary Rehabilitation Program: A Mixed-method Study
Type of the Article	Short Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> Significant, it explores the application of immersive VR technology in enhancing more effective management of chronic respiratory condition. Yes The abstract provided a clear overview of the research The manuscript is well-structured Clear methodology and results that are well-supported by the data from this manuscript make it appears scientifically correct Additional references could be included to further support the discussion on the current challenges in pulmonary rehabilitation and the potential benefits of VR in this article. <ul style="list-style-type: none"> - The manuscript could benefit from a more detailed discussion of the limitations of the study and potential avenues for future research. - The inclusion of more visual aids, such as images or videos, to illustrate the VR environments and experiences could enhance the reader's understanding of the study's findings. - The manuscript could be further strengthened by including more specific details about the VR equipment and software used in the study, as well as any potential future developments in VR technology that could impact its application in rehabilitation. 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	Yes	
<p>Optional/General comments</p>	Good written article.
