PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes. The study topic is relevant yet rarely studied. Particularly, it was important to narrow down to pregnant women and postpartum.</p> <p>Yes. However, make it shorter and include the name of the regional hospital</p> <p>Yes.</p> <p>Yes.</p> <p>Yes.</p> <p>Yes.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes. However, correct tenses so that it appears to be a reported scenario but not a current issue. See the yellow marked areas in the manuscript as examples</p>	
<p>Optional/General comments</p>	<p>In the conclusion, let the conclusions stand more prominently, each relating to the study objectives; let not a reader struggle to find what was concluded.</p>
