(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Ocular trauma is a very sensitive topic in India, contributing to adequate burden of permanent blindness. Manuscript has evaluated the causes, demographic details of the ocular injuries, that will be helpful to evaluate the root cause, public awareness, incorporating the preventive measure wherever possible for prevention.</p> <p>1)A study of clinical profile of patients presenting with ocular trauma to a tertiary care hospital. (title can be concised. Hospital name and locality should not be mentioned in title)</p> <p>Yes</p> <p>Yes</p> <p>Analysis is percentage based. Tests of significance, providing confidence intervals will increase the strength of the study.</p> <p>2) Though eye is an delicate organ, but has various highly developed protective mechanisms. So statement is not much convincing. 3) Treatment protocols for ocular injuries are almost same all over. 4) Any evidence for the statement? Now a days female employment has increased significantly. 5) Age distribution of sports related injuries not given, statement is assumption based. 6)For ref 27 and 28, if author can compare with indian studies. -Rajendra P. Maurya, Tanmay Srivastav, Virendra Pratap Singh, C. P. Mishra, Abdullah Al-Mujaini, The epidemiology of ocular trauma in Northern India: A teaching hospital study Oman J Ophthalmol. 2019 May-Aug; 12(2): 78–83. 7) Statement is assumption based. Author can provide references for the statement.</p>
