

Editor's Comment:

I have carefully reviewed both the first edition and the revised edition of the review article, taking reviewers' feedback into account. The reviewers' comments were relevant and constructive and contributed significantly to improving the overall quality of the manuscript. It is evident that the authors have skillfully incorporated the revisions based on the reviewers' suggestions. As a result, the manuscript has been refined and presents clearer content, more thoroughness and better alignment with the thematic focus of the journal.

Apart from some minor concerns regarding typesetting, reference checking and linguistic editing, the manuscript is carefully prepared and comprehensive. In my view, the document addresses a relevant topic and has the ability to make a significant contribution to the relevant field of knowledge. I recommend accepting the manuscript as is.
