Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. The manuscript is important for the scientific community due to its relevance, methodological rigor, and practical implications. This study appears to fill a gap in the existing literature by focusing specifically on the prevalence of prolonged grief disorder (PGD) among the elderly in India. This is a novel contribution, as most studies on COVID-19-related grief have been conducted in Western contexts.</p> <p>2. The title is suitable, clear, concise and directly informs the reader about the primary subject. It accurately reflects the study's focus on the prevalence and factors associated with pathological grief among elderly individuals who have experienced losses due to Covid-19.</p> <p>3. The abstract is comprehensive. It includes the background, objective, methods, results and conclusion</p> <p>4. The subsection and structure of the manuscript are appropriate and follow standard research paper format.</p> <p>5. The manuscript appears to be scientifically correct. The study use appropriate methods to collect and analyse data. The discussion section relates the findings to existing literature, providing context and highlighting the implications of the study.</p> <p>6. The references are generally sufficient. Add more recent studies and meta-analyses on interventions for prolonged grief disorder and the psychological impact of COVID-19 could provide a more comprehensive background</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>There are few areas where minor improvements could enhance clarity and readability. Such as :</p> <p>a. It has a few grammatical errors and punctuation issues</p> <p>b. Ensure consistent use of terminology and formatting throughout the manuscript</p>	
<p>Optional/General comments</p>	<p>The introduction could benefit from a more extensive review of recent literature on the psychological impact of COVID-19, particularly studies focused on the elderly and grief.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><u>(If yes, Kindly please write down the ethical issues here in details)</u></p>
