

Review Form 1.7

| | |
|--------------------------|---|
| Journal Name: | Journal of Advances in Mathematics and Computer Science |
| Manuscript Number: | Ms_JAMCS_119485 |
| Title of the Manuscript: | ON THE NUMBER OF CYCLIC CODES OVER Z_{31} |
| Type of the Article | Original Research Article |

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljamcs.com/index.php/JAMCS/editorial-policy>)

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| <p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? 2. Is the title of the article suitable? 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p> | <ol style="list-style-type: none"> 1. The important of cyclic codes for scientific community is for coding theory. It is because cyclic codes has error-correcting codes that have algebraic properties. 2. The primacy of cyclotomic polynomial for The Number of Cyclic Codes Over Z_{31} 3. Yes. That's enough to publish in the Journal of Advances in Mathematics and computer sciences 4. the subsections and structure of the manuscript is already compatible with the journal. 5. Yes, I do. It is because matching for cyclotomic polynomial which can be use for cyclic codes. 6. The reference should be from the current year so that the knowledge is still relevant for today. at least a reference to cyclic coding is added. Minimum reference is 20. | |
| <p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? | <ol style="list-style-type: none"> 1. The communication is less efficient, some reader will be not understand the function and the implementation for coding codes in the past or in the future in this journal. 2. The reference is used which not proper in this year. | |
| <p>Optional/General comments</p> | | |
