

Editor's Comment:

- 1, the topic is OK , the design is scientific, closely combined with practical and realistic pediatric problems.
2. The research method is correct, the paper writing is serious, the attitude is scientific and rigorous. In particular, the diagrams are very clear and satisfactory.
3. The thesis and research data are reliable and reliable.
4. Correct statistical methods.
- 5, the main advantages and disadvantages of the paper and problems; There are 60 references of the article .the references is enough 。
- 6, The "General impression" is innovative to some extent and can be considered for publication after mini modification.
