

**Review Form 1.7**

Journal Name:	<b>Journal of Advances in Medicine and Medical Research</b>
Manuscript Number:	<b>Ms_JAMMR_117154</b>
Title of the Manuscript:	<b>Plasma cell leukemia presenting as a chest wall mass: a case report</b>
Type of the Article	

**Review Form 1.7**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes</p> <p>Yes</p> <p>Yes but it needs English</p> <p>Needs major revision, bellow are some suggestions:</p> <p>Observation first paragraph 4<sup>th</sup> line what do you mean by apyrexia?            Observation second paragraph line 2 ( and subtitle of the first figure)please substitute basal region with "inferior hemithorax".            Same paragraph line 3( and 2nd figures, and 6<sup>th</sup> paragraph) what do you mean by parietal?please delete it.            Same paragraph line 4 note "intrathoracic component" instead of endothoracic development.            3rd figure is not bone window ( it is MIP 3d reconstruction). For accurate terms, please refer to the image sources on your workstation.            Observation 3rd paragraph line1 we don't have transmural ultrasound. Please note ultrasound guided biopsy.            Observation 5<sup>th</sup> paragraph line4: solitary chest wall PCL is a better term than extramedulary .            Paragraph 8 line 4 bony lesions instead of extramedulary localizations.</p> <p>I suspect that this case is a plasma cell luckemia or a case of MM because the chest wall involvement is a kind of bony lesion, (which is common in MM), rather than thoracic involvement</p> <p>Yes</p> <p>The manuscript specially discussion and conclusion parts are too long and must be summarized extensively.</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>No</p>	
<p><b>Optional/General</b> comments</p>
