PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>I would say yes. Because the level of student participation in the school environment is affected by many factors. As a result, it can help us to understand how schools can be more effective in promoting student learning and engagement. By understanding the factors that influence students' participation in school, we can develop interventions and programs that can help to improve student outcomes.</p> <p>Yes. But I recommend this "Determining the School Organization and Students' Participation Experiences in New Corella, Davao del Norte: A Mixed-Methods Study Approach"</p> <p>I would say yes.</p> <p>Needs a little modification.</p> <p>Yes. But the qualitative data (interview part) needs clear methodology and data collection procedures.</p> <p>Appropriate. But I advice more references accordingly</p> <p>A clear discussion is needed; mainly for interview parts based on the respondents feelings</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Suitable</p>	
<p>Optional/General comments</p>	<p>Overall, the title is interesting. A mixed method study is not easy. This type of study can be particularly useful for research topics that are complex or that have not been well-studied. I appreciate the effort of researcher/s and his/her/their findings.</p>
