

Editor's Comment:

Accepted.

Thank you for the email. I have reviewed the manuscript and the comments from the reviewers, this interesting manuscript: " Idiopathic Pericardial Tamponade in the Absence of Predisposing Factors: A Diagnostic Conundrum and Therapeutic Approach" Asian Journal of Research in Cardiovascular Diseases The manuscript is important, especially for the cardiologists and the cardiac surgeons. The manuscript discusses the etiological factors for pericardial effusion and how stepwise it could be diagnosed. The authors have highlighted that some of the investigations could be negative in the idiopathic variety. the authors have also discussed the therapeutic mode of treatment for such presentations.

With due consideration the decision on the manuscript titled " Idiopathic Pericardial Tamponade in the Absence of Predisposing Factors: A Diagnostic Conundrum and Therapeutic Approach" for the Asian Journal of Research in Cardiovascular Diseases " is Accepted.
