

**Editor's Comment:**

According to the review report of reviewers, the manuscript needs minor revision for final acceptance.

I read the revised manuscript, still some modifications are needed.

1. Title is not suitable and needs revision on focusing red ginger and storage time.
2. Language is complicated, somewhere past tense and somewhere present. It should be in the past tense as the work is already done.
3. Method for preparation of salted egg using red ginger needs to be comprehensive.
4. Statistical analysis of Table 12 needed to be checked.
5. Clearly conclude the results as 3% addition of red ginger in preparation of salted egg improve .....
6. Also clearly mention the effect of red ginger on storage stability of eggs.

After these changes, the manuscript can be accepted.
