

Review Form 1.7

Journal Name:	Chemical Science International Journal
Manuscript Number:	Ms_CSIJ_119733
Title of the Manuscript:	Novel, Green Synthesis and Antimicrobial activity of Amine-Boranes
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1- Yes , in general manuscript has a good idea, well presented and discussed.</p> <p>2- Yes</p> <p>3- Yes</p> <p>4- enough</p> <p>5- Yes</p> <p>6- yes</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>	<p>Dear author</p> <p>Your manuscript has a good idea, well presented and discussed. Although your idea is new and original but it seems to be somewhat odd</p> <p>In general, the manuscript writing is good but you need to review and correct some points:</p> <p>1- In the method section the N,N-dimethyl aniline used as (0.03 moles) while sodium borohydride utilized as (0.06 moles), they need to be equal in in order to produce an equivalent amount of the product. And if you want to keep them in the present moles you need to give an explanation, why they were double and not equal.</p> <p>2- Also, in the method section you use 100 ml two-necked RB flask, you need to clarify the rezone for using this type of flask.</p> <p>3- In the 2.4 Characterization of AB complex section (The groups that are bound to the N-gen atom) correct to nitrogen</p> <p>4- Why you use gentamicin as control? If you intend to use your new agents in the treatment of the UTI, you need to clarify this.</p> <p>5- The gentamicin is weaker than penicillins and cephalosporines. I wander if you use one of their agents in step of the gentamicin.</p>
